
PreCog Design Method

Strategic Solution Anticipation

marcoterribile.com

THE PREMISE

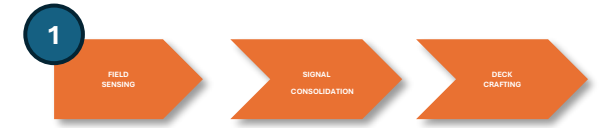

“I don’t solve problems. I arrive before they emerge.”

“**PreCog Design Method** is a lightweight, independent framework for identifying latent opportunities and turning them into strategic, concrete solutions — before they become obvious to competitors.”

THE PROCESS – 3 CORE PHASES

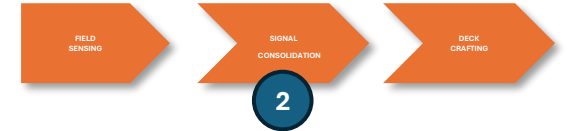

FIELD SENSING

“What others miss, I map.”

- **Unstructured observation** across tech, behavior, and industry trends
- **Focus on** contradictions, inertia, weak signals
- **Output:** silent map of **invisible opportunity**

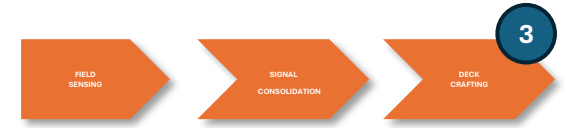

SIGNAL CONSOLIDATION

“Hypotheses with what already works.”

- **Transform intuition** into early solutions
- **Match** them **with** existing **capabilities**
- **Evaluate feasibility** quietly, **before others even look**

DECK CRAFTING

“Strategic triggers, not sales pitches.”

- Concise **Strategic Decks** (6–10 slides) tailored **for selected companies**
- **Sent** directly, unsolicited, **without pressure**
- **First to act leads the change** — others react later

NEED SUPPORT TO MOVE FORWARD?

While moving forward **you might need me as a partner** to develop a prototype and deliver results.

In case you should choose to collaborate with me, **you'll have full access to the other resources** not disclosed within the strategic decks. **This will speed you up from x10 to x100 times faster.**
